

Books in the Barnyard

Main Stay's Books in the Barnyard is a literacy enrichment program supporting all levels of readers.

Program Overview

Main Stay's adaptive farm is a fun and inspiring setting which helps learners recognize their full potential. Sessions are designed by a certified educator and can be customized to your curriculum needs. Single and multi-visit sessions are available throughout the year.

Enhance Literacy Skills

Books in The Barnyard meets a variety of needs. Younger emerging readers experience a vocabulary rich environment with the animals, in the garden and around the farm. As part of a writer's workshop, older readers can author a story about the animals prior to coming to the farm then publish the story by reading it to the animal in their story!

Supportive Environment

Research shows an increase in student engagement when interacting with the "non-judgmental" audience of animal friends which leads to academic progress. (Brous, 2010)
